

# General instructions for the Cool Options Web Map Application

[Web Link:](#)

This mobile application shows cool options to escape the extreme heat this summer. It includes the locations of Salvation Army buildings, libraries, recreation centers, movie theaters, and shopping malls that may offer relief. It works in web browsers as well as smart phones and tablets.

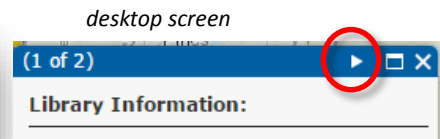

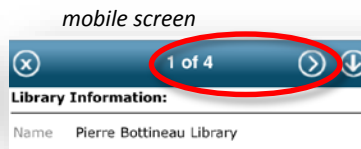

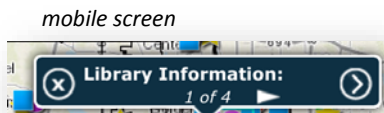

## Map Navigation:

Zoom in and out by clicking on the +/- icons shown, a mouse wheel, or pinch/unpinch motion on mobile devices.

## Location Identification:

Click on a location to display a popup of information including name, address, times, phone, and possible websites. For mobile apps click on location then click on the right arrow in the header bar as shown below left. The header bar may indicate more than one location was selected as shown below center. Use the right arrow to scroll through the selection.

## Map Options and Information:

The following icons will display map panels, to the right or below, with different information and functionality.

A B C

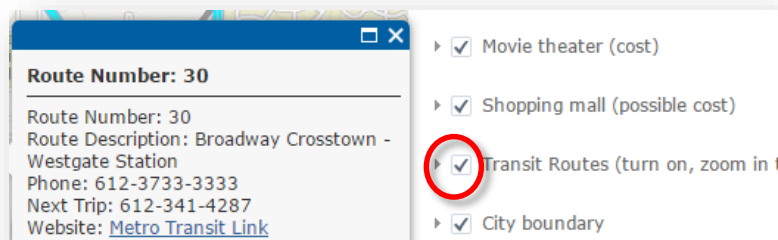

**A** – Will display the legend.

**B** – Layer list showing the available map layers that can be turned on/off.

**C** – General information, helpful links, contacts, and disclaimer

## Bus Routes:

Metro transit routes can be displayed from the Layer List. Check the Transit Routes in the layer list and zoom in until they are displayed. Be patient, it may take a while to load. Click on the route to get more information.

## Search for your address:

In the search box type in the address, followed by a comma and the city. A drop down list will show a list of addresses to choose from. Select the correct address.
