HENNEPIN COUNTY

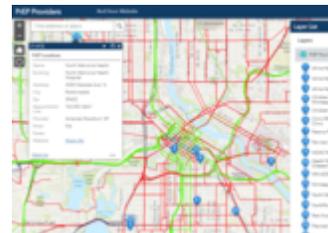

GIS notes

December 2018

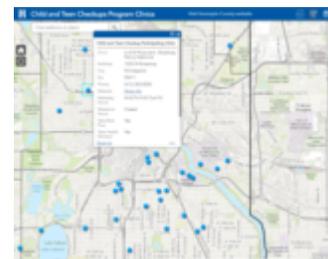

Maps for Health and Human Services

In partnership with the Health and Human Services department, the GIS Office has created a series of interactive maps designed to help the public find clinics for specialized health care:

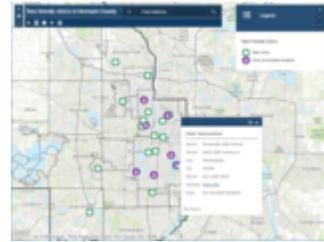

Pre-exposure prophylaxis (or PrEP) is a daily pill for people who don't have HIV but are at high risk of getting it. [This map](#) shows information about PrEP clinics in the metro area that specialize in this, as well as transit information to help get to the clinics.

The Hennepin County Child and Teen Checkups (C&TC) Program can help with the specifics of keeping your family healthy. [The C&TC Clinics map](#) shows the location of clinics that are part of this program.

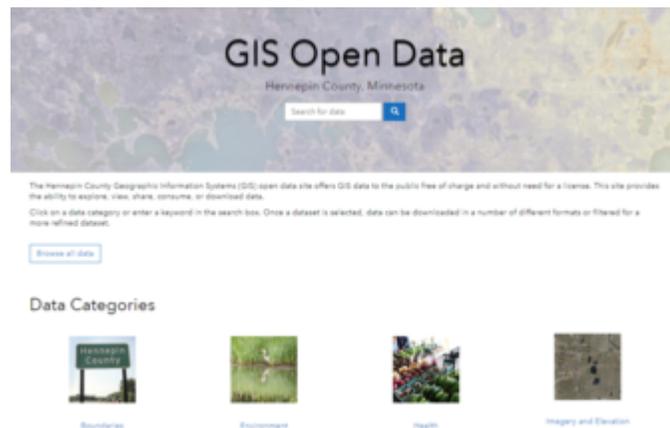

Teenagers facing unique challenges regarding their health choices can use this map to find [teen friendly clinics](#).

To explore more health-related maps visit the [GIS portal](#). Click on Maps/By category/Health.

Hennepin County GIS Open Data

Don't forget to visit the [Hennepin County's GIS Open data site](#). This site offers a collection of GIS data to the public free of charge and without need for a license. It provides the ability to explore, view, share, consume, or download data.

ADA Transition Plan Map

Hennepin County has developed [a plan](#) to make county roads more accessible, as outlined by the Americans with Disabilities Act (ADA), by addressing specific county policies and programs relating to ADA. This project aims to eliminate all barriers (including utility poles, fire hydrants and signs) within sidewalks and improve pedestrian travel at intersections and crosswalks.

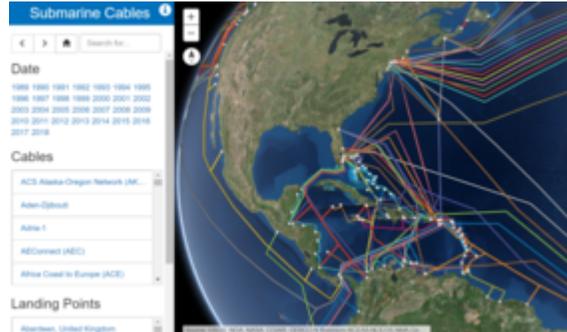

Through the development of the ADA Transition Plan, the county collected inventory of sidewalk and curb ramps along county roads, gathered input from

the public, and assessed problematic areas. This map shows data associated with ADA and is one tool Hennepin County is using to prioritize and schedule maintenance and reconstruction projects.

Map of Interest - Global Submarine Cables

The Submarine Cables map shows a global network of underwater communication cables. Click on any cable line and see which landing points it services, as well as more information about the cable. Click on any landing point to see the network of cables that service the specific location.

This map is a good example of how complex and interconnected information can be visualized with a simple and intuitive interface.
